

Herb Garden Kit Instructions

1. Place the pellet in a watertight container and add warm water. This will allow the pellet of dirt to expand.
2. Drain excess water when pellets are 1-1.5 inches tall. Put soil in cup.
3. Plant seeds
4. Water plant when pellets turn light brown.
5. To harden off plants, place outside in shade for several days, gradually increasing time spent outside each day.
6. To transplant, dig holes deep enough to cover top of pellets.
7. Gently firm soil around pellet and water.
